

INTERFACES

ROUTEABLE
Means ability to generate uris
and parse paths on execution.

INSTALLABLE
Check if is installed,
otherwise tries to install.
Modifies if object is enabled
in system.

CACHEABLE
Generated output is cacheable
and available for reuse.

DEPENDENT
Object is dependent on
module, controllers, models,
or associatives. Affects enabled
flag.

EXECUTEABLE
Object is executeable
from the page templates.
Execution is called.

ABSTRACT CLASSES

CONTROLLER
Implements EXECUTEABLE,
extends RUNTIME.

MODULE
Extends RUNTIME.

MODEL
Extends RUNTIME.

CLASSES

RUNTIME
manages compatability with
all interfaces.
Extends SINGLETON.

SINGLETON
Manages compatability with static
objects. getInstance(),
_isConstructed(), _isInstanciated(),
_flagThisConstructed(). Extends BASE.

BASE
Makes it possible to get absolute
filename to class using
getAbsolutePathname().
